A crows nest on sailing ships provided a superb location for viewing the great ocean vista. Perched above the fray of activity, the watchman could enjoy unobstructed views.

The Crows Nest by MossCreek is also designed for capturing beautiful views of both land and water. A two story Great Room utilizes bountiful glass and an angled indoor/ outdoor fireplace, to frame the natural beauty of the outdoors. The design also features five bedrooms with a master on the main, open Kitchen/ Dining/ Great Rm, and outdoor living on a rear porch.
